

Pergola and Patio Addition

Location:
Norfolk, VA

Projected Completion Date:
June 2010

ABC Consulting, Inc. provided the structural design and construction management for this gorgeous pergola and patio that were constructed to enhance the homeowner's backyard experience. It was beautifully designed by Ann P. Stokes Landscape Architects, LLC to blend in with the original design of the existing residence. For their durability and beauty, premium materials were used such as IPE decking, plytanium dryply plywood, number one red cedar, aztek trim, stainless steel nails and limestone stair treads. The two structures are solid and are designed to withstand the high winds encountered on the bay.
